

## XRS DEPOSITING SYSTEMS

# CLUSTER PACKED AUTOMATIC COOKIE DEPOSITOR

The Champion Model XRS Depositors produce wire-cut type cookies and place them directly onto oven bands or waxed paper, ready for baking, packaging or freezing.

- Exclusive, aggressive feed rolls provide continuous consistent dough feed for a wide range of products.
- Sanitary wash down design of entire machine.
- Precise wire cutting system with filler-block die assures accurate piece weights.
- Large selection of standard dies available as well as custom designs per your specifications.
- Integrated waxed paper feed system allows products to be placed directly on waxed paper.
- Portable design for ease of relocation.
- Belt lifting device at drop point to ensure improved product placement.
- Dough patterns fully adjustable by auto advance mechanism and die change.
- Variable speed conveyor belt and feed roll drive for production output selection.
- Fully programmable 2 axis precision Servo control screen for flexibility of operation set-ups.
- Dough patterns can be divided utilizing longitudinal paper slitters and pneumatic cross cutter.
- Unique gravity "beadwall" discharge section for paper transfer to your conveyor or packing table.
- Contact factory representative for other applications such as Scones, Biscotti, Brownies and Biscuits.
